

Federico Stimpfl

Senior .NET Developer | Backend Services, Data & Integrations · Production Reliability

contacto@federicostimpfl.com.ar www.federicostimpfl.com.ar linkedin.com/in/federicosdev

Hard Skills

- .NET Software Development
- C#
- .NET Core
- ASP.NET MVC
- Dapper
- Blazor Razor
- Entity Framework
- SQL
- PL/SQL
- Azure
- Git
- HTML5
- CSS3
- JAVASCRIPT
- API RESTful
- gRPC / SignalR
- Minimal APIs
- Software Integration
- DevOps
- Agile
- SOLID Principles
- Incident & Bug
- Troubleshooting
- Debugging
- Ticketing Systems
- (Remedy / Jira)
- Application Support
- CI/CD
- xUnit/ Moq
- ADO.NET

Soft Skills

- Effective Communication
- Cross Teamwork colab.
- Adaptability to change
- Analytical Thinking
- Crisis Management.

Languages

- English / Spanish (Bilingual)

SUMMARY

Senior .NET Developer focused on backend services, data and integrations, with a strong emphasis on production reliability. I mainly work with ASP.NET Core, C#, Entity Framework Core, SQL Server and RESTful APIs, building and evolving .NET backends for both legacy .NET Framework and modern .NET (6/7/8) solutions. I'm comfortable with Redis (caching), RabbitMQ (messaging/queues), background services and Azure cloud deployments using GitHub-based CI/CD workflows, and I also have experience building front-end features with modern JavaScript and Vite.

PROFESSIONAL PROFILE

- Senior .NET Developer experienced across the full software lifecycle.
- Strong focus on backend development with C#/.NET, data access and system integrations.
- Used to working in cross-functional teams and delivering maintainable, high-quality software.
- Hands-on experience with legacy .NET and modern .NET 6/7/8, plus contemporary front-end tooling.

WORK EXPERIENCE

C&S Informatica (Cliente: Banco multinacional)

.NET Developer
Buenos Aires, Argentina · Jan 2026 – Nov 2026

- Developed unit tests using xUnit and Moq, refactoring legacy .NET code with AI-assisted development techniques to improve testability, code quality and address technical debt.
- Identified and remediated security vulnerabilities and technical debt in .NET backend applications, improving code security and maintainability.
- Developed and modified banking reports covering exports, checks, deposits and account balances, implementing changes in C#/.NET and SQL to accommodate evolving business rules.
- Implemented security-related enhancements in .NET applications, adapting backend logic and security controls to changing business requirements.
- Analyzed and optimized existing .NET code to improve application performance, efficiency and reliability.
- Adapted and processed historical banking data to enable the reprocessing of financial reports required for regulatory compliance and audit purposes.
- Performed server setup and configuration to support application environments and operational requirements.
- Worked on the integration of GitHub, CI/CD pipelines (TeamCity) and static application security testing (SAST) tools (SonarQube), supporting automated testing, code quality analysis and continuous integration workflows.

COGNIZANT (Client: Cargill worldwide)

.NET Developer – Backend & Production Reliability (L3, SME)
Buenos Aires, Argentina · Jan 2021 – Sept 2025

- Designed, developed and maintained .NET applications in production, delivering code-level fixes, enhancements and new components built from scratch.
- Performed L3 incident analysis and troubleshooting using .NET, SQL Server and PL/SQL, improving system stability and response times in live environments.
- Built new .NET services and internal tools from scratch to support integrations, monitoring and automation workflows.
- Acted as Subject Matter Expert (SME) for .NET applications, coaching international teams (India, USA, Mex etc.)
- Worked across multiple enterprise .NET solutions (CRM, ERP, S2P, B2B, e-billing, SaaS), exposing and consuming RESTful APIs on backend components and occasionally working on frontend parts.

SICLABS (Clients: La Caja de Ahorro, Experta ART, La Estrella, Generali Group)

.NET Backend Developer – Client Solutions & Continuous Improvement
Buenos Aires, Argentina · Feb 2015 – Sept 2020

- Developed and maintained .NET backend components for key client solutions, delivering bug fixes, small features and configuration changes.
- Created SQL scripts and data updates to correct inconsistencies and support new business logic, improving correctness and performance.

TARGET MINDS CONSULTING & SOFTWARE (Clients: SanCor, YCRT)

.NET Software Engineer – End-to-End Solutions Development
Buenos Aires, Argentina · Jan 2005 – Feb 2015

- Designed and developed .NET business applications from scratch for a large enterprise, covering all layers: database, business logic and user interface.
- Built web and desktop solutions using C#, ASP.NET (Web Forms and later MVC), ADO.NET/Entity Framework, SQL Server, HTML and CSS.
- Modernized and extended existing systems for a government organization, implementing new features, fixes and integrations while keeping services running in production.
- Collaborated directly with stakeholders to understand business requirements and deliver software that was production-ready and aligned with real operational needs.

ACADEMIC TRAINING

- **Technical Programmer:** ISIS, ARGENTINA
- **Literary Translation:** Institute of Language Training
- **National Baccalaureate**: National School No. 2 Domingo F. Sarmiento
